

model

model definition A

model definition B

instance 1  
of model definition A

instance 1  
of model definition B

*file.xml*: model  
definition A

The diagram illustrates a 'model' container (light green rounded rectangle) containing four elements: 'model definition A' (white dashed border), 'model definition B' (white solid border), 'instance 1 of model definition A' (yellow solid border), and 'instance 1 of model definition B' (yellow solid border). Curved arrows point from each instance back to its corresponding definition. An arrow points from 'model definition A' to an external file icon labeled '*file.xml*: model definition A'.
