

SBase

```
classDiagram
    class SBase
    class Reaction["Reaction (extended)"]
    Reaction --|> SBase
```

The diagram illustrates a class hierarchy. At the top is a solid rectangular box labeled ***SBase***. Below it is a hollow triangular arrow pointing upwards towards the ***SBase*** box. This arrow originates from a dashed green rectangular box. Inside this dashed box, the text **Reaction (extended)** is written in green, and below it, the attribute `isLocal: boolean` is listed in green.

Reaction (extended)

`isLocal: boolean`
