

model

model definition A

model
definition X

model
definition Y

model
definition W

instance 1
of model definition A

The diagram illustrates a hierarchical structure of model definitions. A large light green rounded rectangle labeled 'model' contains three nested rounded rectangles. The top one is 'model definition A' (light gray), which contains 'model definition X' (white) and 'model definition W' (white). 'model definition X' contains 'model definition Y' (white). At the bottom of the 'model' container is a yellow rounded rectangle labeled 'instance 1 of model definition A'. A curved arrow points from the left side of this yellow box to the left side of the 'model definition A' box.
