

***SBase***

```
classDiagram
    class SBase
    class AdjacentDomains {
        id: Spld
        domain1: SpldRef
        domain2: SpldRef
    }
    AdjacentDomains --|> SBase
```

The diagram illustrates a class hierarchy. At the top is a box labeled ***SBase***. Below it is a box for the **AdjacentDomains** class. A vertical line with an open triangle arrowhead points from the **AdjacentDomains** box up to the **SBase** box, indicating inheritance. The **AdjacentDomains** box is divided into two sections: the top section contains the class name, and the bottom section contains the attributes: `id: Spld`, `domain1: SpldRef`, and `domain2: SpldRef`.

**AdjacentDomains**

id: Spld

domain1: SpldRef

domain2: SpldRef
