

SBase

```
classDiagram
    class SBase
    class Reaction["Reaction (extended)"]
    SBase <|-- Reaction
```

The diagram illustrates a class hierarchy. At the top is a solid rectangular box labeled ***SBase***. Below it is a triangular arrow pointing upwards, indicating inheritance. This arrow points to a dashed rectangular box. Inside this dashed box, the text **Reaction (extended)** is written in green, followed by the attribute `isLocal: boolean` also in green.

Reaction (extended)

`isLocal: boolean`
